Healing through Sound

The Lord is My Healer CD has been a gift to many who have experienced grief, pain and for some, emotional trauma. Some have claimed they immediately began to feel their systems calm down each time they listened to it. The L-rd is our Redeemer and Rapha Healer. It begins with beautiful instrumental music in the background with only scripture spoken in English. Then, the second part of the CD uses ALL the exact same scriptures spoken in Hebrew. As a result, some listeners who are not even Jewish are later drawn to synagogues because it is soothing to me to hear the Word of G-d spoken in Hebrew.

In Genesis, G-d SPOKE the world into existence when His voice hovered over the waters...vibrations... There is a similar concept and principle with color and Irlen Spectral Filters. (glasses) www.Irlen.com. The scope of it all in terms of healing and balance is logical because of frequency. Both healing music and colored Irlen lenses have been successful in providing balance for many.

It is possible that there MAY another correlation with the ancient Royal Raymond Rife Machine which some use it for Lymes disease, cancer and a number of other ills. This is all based upon frequency and balance.

Blessings and LIFE,

Lucy Karen Clay

Linear Notes from CD: The Lord is My Healer, by Alyosha, and narrated by Sid Roth.

With a background of beautiful music, healing Scriptures are spoken first in English, then in Hebrew. Vibrations create and change substance. I recently composed a CD entitled, The Lord is My Healer. Scriptures read in Hebrew accompany the music. It's amazing because people are being touched in their spirits although they may not understand the Hebrew language. Interestingly, a Swiss physician and scientist, Hans Jenny, constructed an instrument called a "tonoscope" to make sound visible on substances like water or sand. Different shapes appeared on the sand as the result of different sounds coming through the device. He then tried spoken words in different languages but nothing happened. When he spoke the Hebrew language, however, the language spoken made the shapes of Hebrew vowels on the sand. None of the modern languages did that.

I believe that, when God spoke the universe into existence, the sound of His voice set in motion frequencies* that became shapes. In fact, many scientists believe that everything in this universe is made of sound. Today, when we align our thoughts with the thoughts of God and speak them out, the creative power of God goes forth to accomplish that which He desires. That is why I believe that when the healing Scriptures are spoken in Hebrew it makes an imprint, not only on our mind, but also on our cells for we are made of dust (sand).

This is the glorious focus the Lord is directing us in with music and the spoken Word of God for such a time as this! It is the understanding of this "Quantum Faith Science," which God is granting to us with sound, frequency*, vibration and the manifestation of matter. It has to do with creationism, the formation of entire planetary solar systems being created by the sound of the voice—God's Word!

As I continue to compose and perform, I pray for the anointing of God to play the Master's pieces in celebration of freedom, with the expression of our Father's love and His healing heart, and in an explosion of vibrancy and joy that hits the DNA with God's frequencies*. For I truly believe that the next major revival will be the restoration of the Father's love and that it will spread throughout the whole world. Notes carry frequencies* and our DNA picks it up at the cellular level and we are impacted by the creative power of God through sound as He gives the music from heavenly realms. This is what Hans Jenny discovered—that there is power in the Hebrew language for frequencies* to imprint the very DNA and atoms of our bodies. God originated His Word in Hebrew and now we are seeing the impact in healing our souls and bodies, and refreshing our spirits.
